

DMG SOLAR COLLECTOR

New in Ireland, the DMG collector delivers the highest output of any solar collector available in Ireland at present.

The DMG solar collector boasts the highest output per tube currently available in Ireland.

Provides up to 75% of hot water required.

Less tubes required due to higher output.

Tested to highest European standards.

Professional Installers (SEAI registered).

Over 500 solar systems installed in Ireland.

Free solar survey and system design, to ensure your expectations are met.

This collector is available in 4 sizes - 8, 10, 12 or 16 tubes per collector.

The 100mm tubes offer a significantly higher output than the standard 58mm tube and so, fewer tubes are needed. This is particularly good news for those with limited roof space.

Features of the the DMG Solar Collector

- Advanced Heat Exchange Method.
- Highly absorbant coating on tubes, maximising absorbtion of sunlight.
- Quick start up – can deliver output after just 2 minutes.
- Weather resistant even in extreme conditions
- Low maintenance
